

Build your own traditional house

You will need...

- clay (you can get it at the potter's shop)
- cardboard
- straw/ dry grass

*Knead and roll the clay to make a small circle (thickness: 1/4inch).

*Roll the clay to make a long rectangle. That will make the walls of the hut. You can stick straw on the walls to give it a more authentic look. Adjust the walls on the platform and join by using water.

*Take the cardboard and cut a circle. Make a cut in the circle and fold it to make a cone. Glue.

**Glue the straw on the cone. Now the roof is ready.*

**Adjust the roof on the wall.*

Now your cute Rajasthani hut is ready. Don't forget the Griha Pravesh puja or house warming ceremony!!
